

Sage Journals on kirjastuse Sage ajakirjade portaal, mis annab juurdepääsu üle 1100 ajakirjale erinevatelt teadusaladelt, sh üle 200 Gold Open Access ajakirjale (Gold Open Access – artiklid tehakse pärast avaldamist kohe kõigi tasuta kättesaadavaks).

Juurdepääs KV arvutivõrgus IP-numbri põhiselt.

Journals by Discipline: kataloog, kus ajakirjad on organiseeritud teadusvaldkondade kaupa. Siin saab kiiresti leida konkreetse valdkonna alla kuuluvaid ajakirju ja sirvida neid lihtsalt nimekirja kujul. Soob hästi kiireks ajakirjade otsinguks ja valdkonnast piiritletud ülevaate saamiseks. Sõjandusalaseid ajakirju leiab nt valdkonnast **Social Sciences & Humanities** alamvaldkonnast **Peace Studies & Conflict Resolution**.

INFOOTSINGUTE VÕIMALUSED

I Võtmesõnaotsing. Sisestades võtmesõna(d) otsingukasti, kuvatakse tulemuseks kogu seotud materjal. **Fraasiotsing:** lisades 2 või enamast sõnast koosnevale väljendile jutu- märgid, on tulemuseks ainult need viited, kus fraas esineb täpselt sellisel kujul – vähem, aga asjakohasemad tulemused. Võimalik kasutada operaatoreid **AND**, **OR** ja **NOT**. Ilma jutumärkide ja/või operaatoriteta lisatakse sõnade vahele vaikimisi **AND**, mis toob tulemuseks rohkem artikleid, kuid nende hulgas on rohkem mitteasjakohaseid.

Abstract

The purpose of the study is to investigate the relationship between the experience of conscripts in their training period and their subsequent attitude toward national military service immediately after training. Self-report questionnaire is used to measure the experiences of Estonian conscripts ($n = 518$) in three categories: perceived stress, applied coping strategies, and evaluation of training as important. Attitude toward national military service is measured as a critical versus neutral/positive answer to an open-ended question. We found that a perceived reduction in general quality of life, concerns about what is happening at home, and experiencing/expressing negative emotions were associated with a critical attitude. In contrast, taking a proactive outlook toward training and finding military-specific aspects personally important were associated with a more neutral/positive attitude. Our findings emphasize the importance of improving the conscription training experience in order to foster less critical attitudes toward service and are discussed from a person-environment perspective.

Although conscription (or draft) is relatively widely practiced worldwide ([Barany, 2017](#); [Bove & Cavatorta, 2012](#)), the relevance of conscription as a research topic can easily be dismissed in a world where military service is seen increasingly as a professional affair. In an age of biotechnological improvement of human
